## FrogLine Retro Lifeline

Picture contains extensions which may not be required

Retro FrogLine Lifeline is a height safety system designed to be mounted on the surface of a metal roof profile as part of a horizontal lifeline system. The intermediate anchor limits the lifeline span distances, the end anchor attachment points are designed for the cable to start and terminate at and the corner unit is designed for the cable to run through the corner anchor re-directing it by up to 90 degrees.

- Designed to be mounted into various metal profile roof sheeting with steel purlin construction.
- Equipped with an engineered energy absorbing region to minimise loads on users and structures in the event of a fall.
- Suits roof pitches up to 25 degrees.
- Intended for use with 8mm stainless steel cables, utilising the Frogline Shuttle System, upto four users per system, two users per span.
